All artwork, designs and images must be provided with a minimum of 250 DPI. Volume Press is not responsible for images printed as fuzzy, distorted or pixilated due to customer provided artwork.

COLOR PROOFING & MATCHING

Because of differences in equipment, paper, inks and other conditions between color proofing and production pressroom operations, a reasonable variation in color between color proofs and the completed job is to be expected. When a variation of this kind occurs, it will be considered acceptable performance.

Volume Press is not liable for color matching or ink density on computer screen proofs approved by the customers. Screen proofs will predict design layout, text accuracy, image proportion and placement, but not transparency issues, density, or color including but not limited to conversions from RGB to CMYK. If you choose No Proof print as is, you assume full responsibility for the printing outcome.
